SAFE RETURN TO ACTIVITY

Solutions to protect
the most important:
People

Following general guidelines of the WHO, in order to minimize the risks of community contagion in multiple scenarios of business activity or intense circulation of people, IRMARFER is able to provide companies, for an temporary use or in an permanent regime, a wide range of preventive health solutions, well-being and safety, aiming to anticipate COVID-19 protection measures.

A multidisciplinary team, dedicated to the development of these solutions, allows us to design and develop structures, equipment and other resources for, among others:

- Access control, shift changes in industrial units or services;
- The admission process in public spaces that involve heavy customer circulation, such as airports, public transport, shopping centers;
- The admission process at sporting, cultural or recreational events characterized by the physical proximity of the participants
- The process of social separation and distancing, through the creation of barriers and modular separators, for the adaptation of different spaces, in offices, restaurants or in other situations in which, the minimization of contamination risks can be a factor of trust for customers and users, essential to increase activity;

01. SORTING STRUCTURES / ACCESS CONTROL - OUTDOOR SPACES

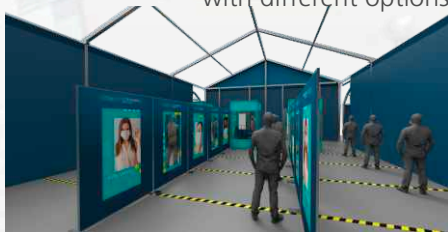

IRMARFER provides a complete solution that combines the provision of bespoke sorting or access control facilities, with temperature measurement equipment - in accordance with WHO recommendations to create the safest and most efficient solution to protect work teams, as well as visitors or customers.

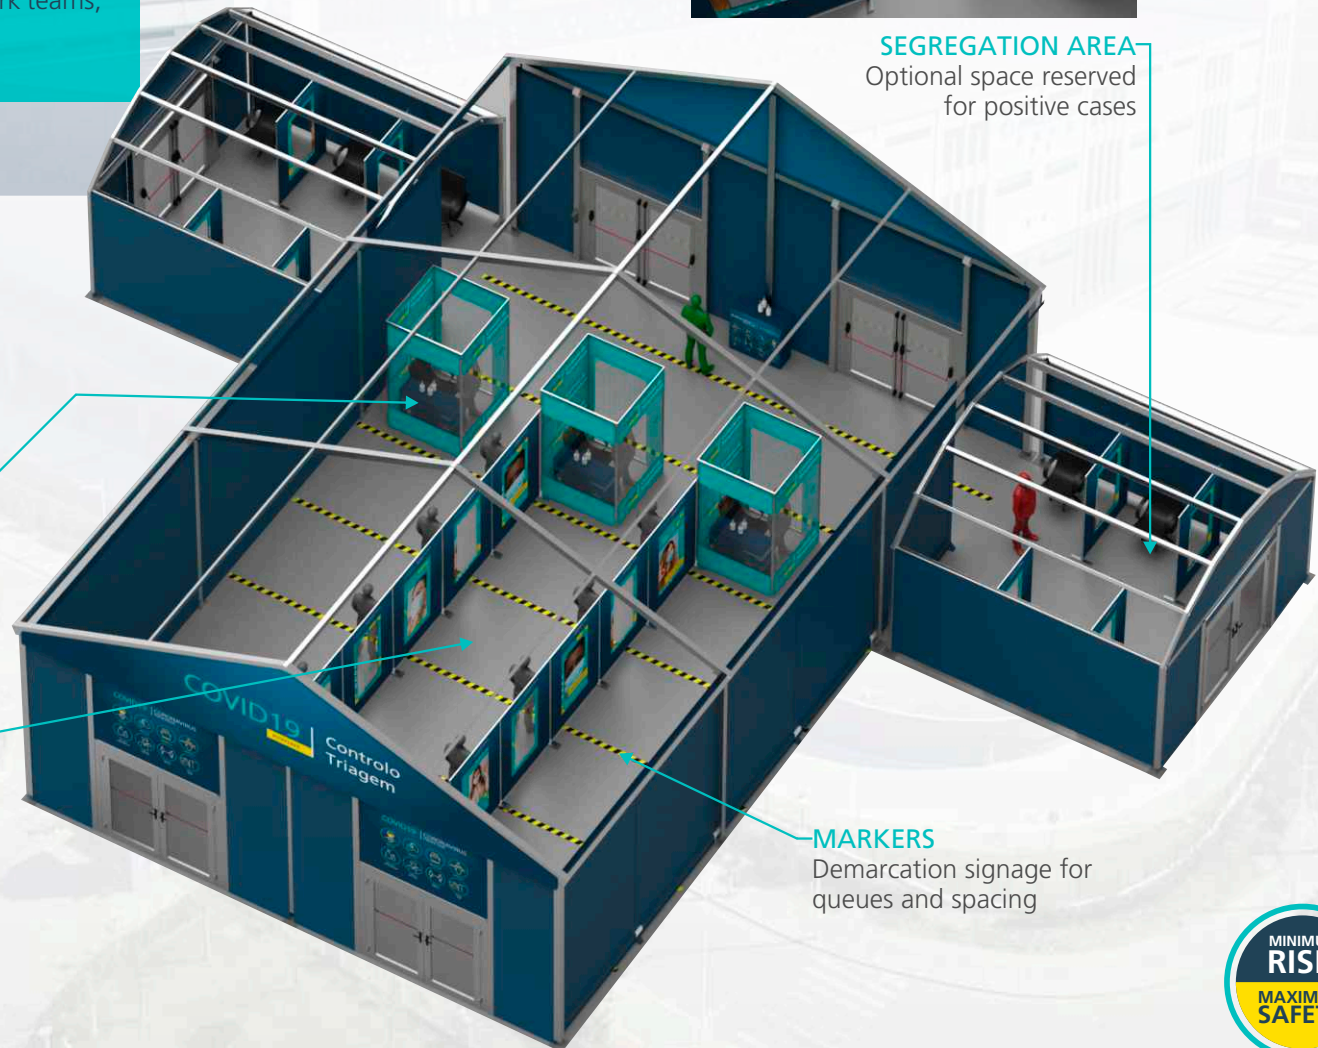

SEGREGATION AREA
Optional space reserved for positive cases

CABINS
Protected cabinets for control technician

CORRIDORS
Separating screens with different options

MARKERS
Demarcation signage for queues and spacing

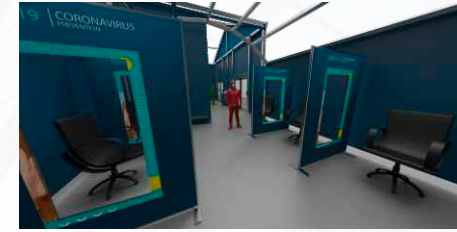

01. SORTING STRUCTURES / ACCESS CONTROL - OUTDOOR SPACES

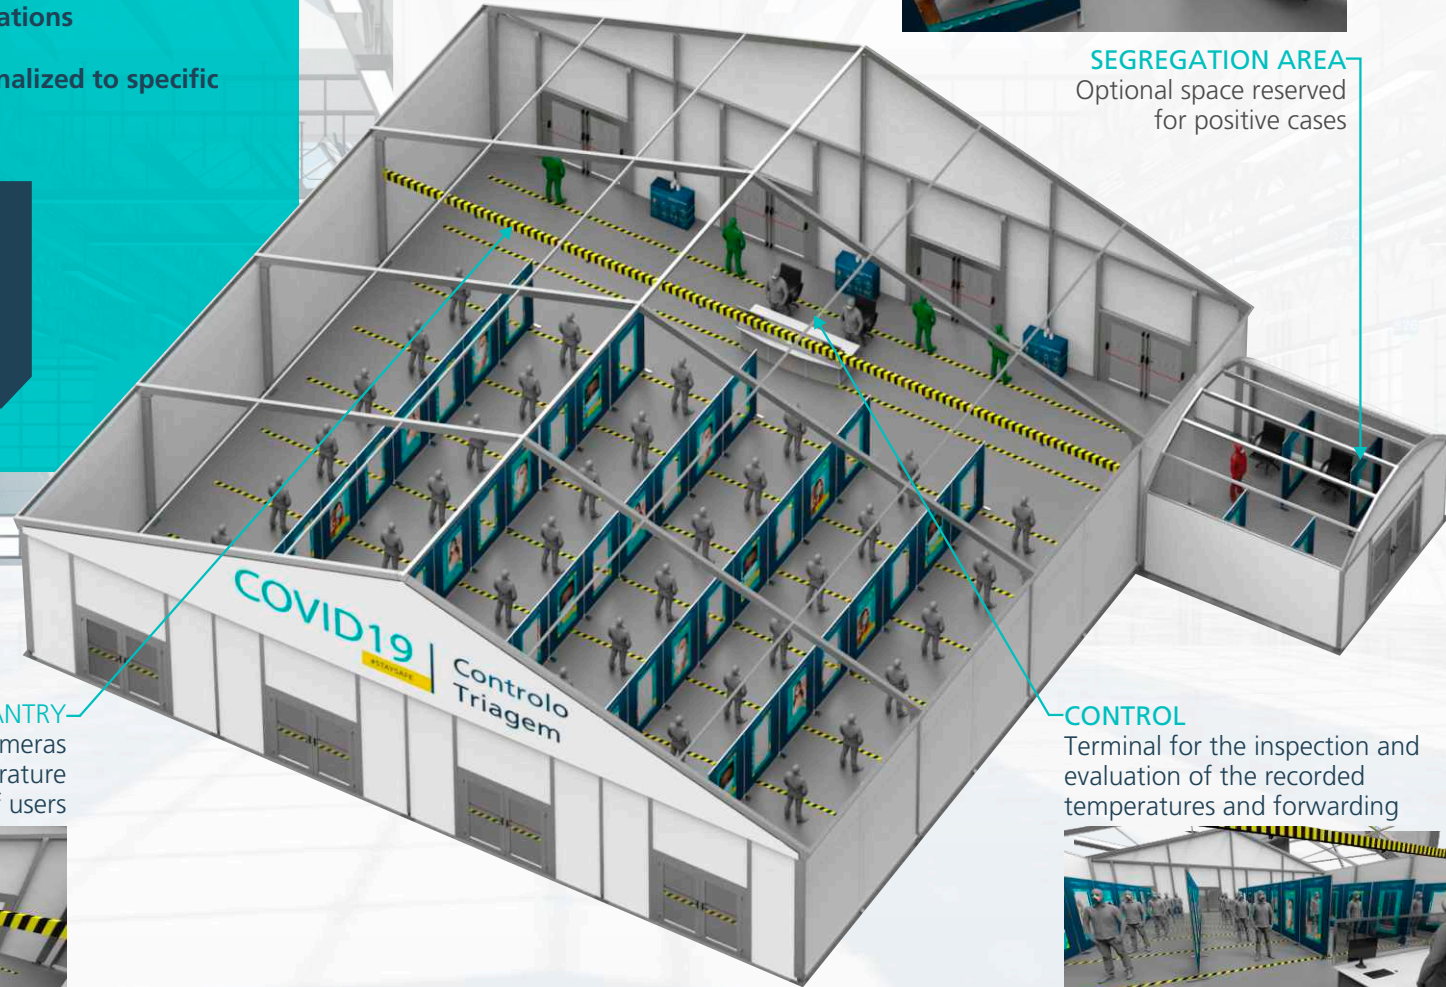

- Fast flow of entry into different spaces
- Setting flexibility near critical control locations
- Minimizing impacts on operations
- Different size options personalized to specific needs

Other usage options

- Canteens
- Waiting / Common Rooms
- Storage

SEGREGATION AREA
Optional space reserved for positive cases

THERMAL CAMERAS GANTRY
Application of thermal cameras for the temperature measurement of users

CONTROL
Terminal for the inspection and evaluation of the recorded temperatures and forwarding

02. SORTING SOLUTIONS AND ACCESS CONTROL - INDOOR SPACES

In indoor spaces with large circulation flows, whether employees, visitors or passengers, the need for access control, screening and guidance, becomes crucial for the protection of everyone.

IRMARFER, through a modular construction system, makes available to the different spaces a set of solutions for the creation of circulation and social distance corridors, offices, segregation spaces, gantries with thermal cameras and respective readers, among other solutions.

The capability to adapt materials and modular solutions allows specific responses to the needs of each sector.

Airports

Public transport stations

Shopping malls

03. TUNNELS / DESINFECTION BOOTHS

Tunnel for the disinfection of people and goods, with the aim of providing safe entrances for everyone, in particular for those who work in close contact with groups and, therefore, stand at greater risk.

Ideally, this disinfection tunnel should be installed at the entrance to public offices, supermarkets, airports, hospitals, ports, stations, etc.

Two alternative solutions has been developed, for outdoor or indoor application.

Swiftly assembled, suitable for permanent or temporary installation, the tunnels can be connected for placement in temporary structures or in already existing buildings.

Indoor

Outdoor

Branding possibility

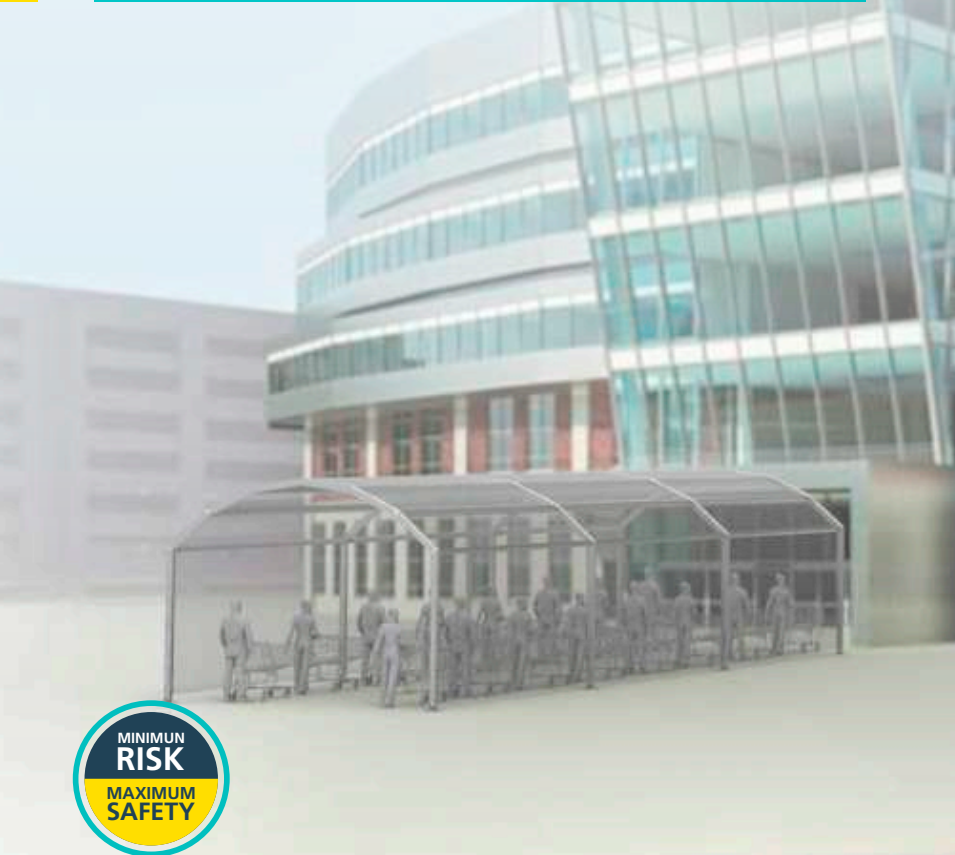

04. STRUCTURES FOR WAITING AREAS / SHELTER

The access to the interior of the industrial and commercial spaces, due to the necessary control and sorting processes, as well as the gradual cadence of the entrances, origin the need to create waiting areas or shelters, which allow, greater comfort and protection of climatic conditions, contributing in that way to a better organization and control of the ongoing operations.

IRMARFER has a multitude of solutions, in terms of models, dimensions and finishes, to meet requests with diverse purposes.
